ARENA BALUSTRADES

A prestigious range of frameless glass balustrades, to preserve your treasured view or compliment modern architecture with the ultimate balustrade styling. Exceptional quality is incorporated in the product design. Custom made to suit virtually any deck shape, ARENA Balustrades provide a premium solution to meet your requirements.

APPLICATIONS

ARENA Balustrades can be used in a wide range of building applications;

- ≡ Residences and Multi-Residential Developments
- ≡ Motels, Hotels, Rest Homes and Hospitals
- ≡ Offices, High-Rise Buildings
- ≡ Municipal Facilities
- ≡ Pool Fences and Gates

MINIMALISTIC APPEAL

Designed to appeal with minimalistic styling and an emphasis on clean lines. Aluminium extrusions are available in natural silver anodising typically associated with the modern minimalistic architecture.

COLOUR AND FINISHING

Balustrades can be finished with either a powdercoat or anodised coating. A wide range of colours are available to choose from. This can allow the balustrade to compliment the aluminium joinery, blend into the surrounding building elements or stand out as a feature.

DURABILITY AND LOW MAINTENANCE

Built for durability and low maintenance, ARENA Balustrades are constructed from stable materials including toughened glass, aluminium extrusions and stainless steel fasteners and componentry.

SAFETY AND COMPLIANCE

Structurally engineered and tested for superior strength and safety, incorporating Grade A safety toughened glass and high strength aluminium sections. ARENA Balustrades are designed for compliance with the New Zealand Building Code.

PANORAMA

The PANORAMA style is simply superb for the treasured view, and to capture that modern frameless glass look. This premium style consists of an aluminium base channel from which the toughened glass balustrade is cantilevered.

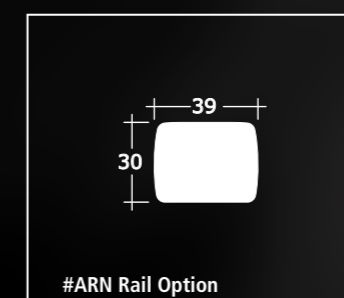

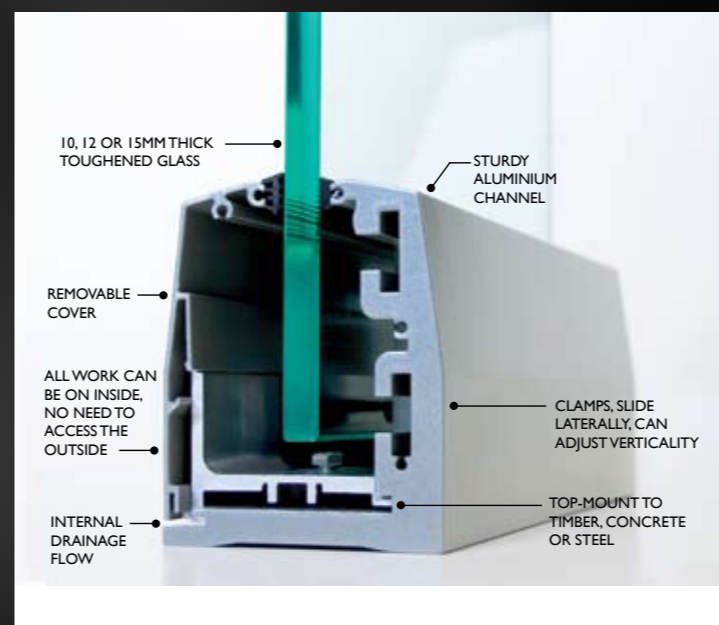

Panorama

METROPOLIS

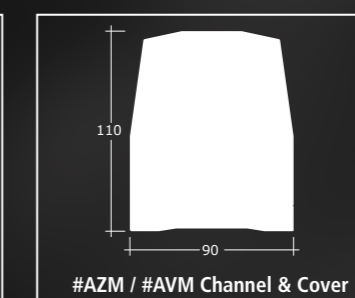

Similar to the Panorama, the METROPOLIS also incorporates a handrail fitted to the top of the glass. Should you cover the benefits of cantilevered glass, but prefer the feeling and additional safety-benefits of a smooth top rail – the METROPOLIS style will be ideal.
